

Weld Master Scan & Track training

Seminar:

Expert training WeldMaster (WM) Scan & Track

Target group:

Service and commissioning engineer

Objectives:

Install, adjust, operate and parameterize the WeldMaster Scan & Track system.

How to adjust the settings of the WeldMaster Scan & Track system. Practical exercises are performed directly on the welding head.

How to perform maintenance and repair of the system.

Duration:

4 Days

Number of participants:

max. 4 participants

Seminar content:

1. System Overview
2. Safety note
3. Hardware
 - a. Cabinet
 - b. Welding head
 - c. Head Monitor
4. Hardware / Commissioning
 - a. Scan Tracker
 - b. Z-Collimator
 - c. Camera
 - d. Laser line generator

5. Teaching of robot path

6. Software

- a. Graphical User Interface (GUI)
- b. Data backup
- c. Graph algorithm

7. Fieldbus interface

8. Troubleshooting

- a. Practical experiments in the laser cell

9. Maintenance / Servicing

End of seminar

After successful completion of the course, a certificate is issued.
