

WELDMASTER OPERATOR TRAINING

You have a WeldMaster Scan & Track purchased or already integrated into your system and would now like to be able to carry out proper and firstclass operation, maintenance and repairs?

IN THIS TRAINING YOU WILL
LEARN EVERYTHING ABOUT THE
WELDMASTER.

We first introduce you to the maintenance procedures and then put them into practice. This training is particularly necessary for changing optical modules and all other qualified topics according to the operating instructions. It ensures smooth installation, replacement and operation.

Target group: Operators and setters

Training location: Gaggenau

Goals:

- General Operation
- Maintenance and repair

Duration: 2 days

Number of participants: Maximum 6

Food: Meals are provided on site and are included in the price.

Seminar conclusion: After successfully completing the training, a certificate will be issued with the areas of focus learned.
